What is OTP/PIN/Password?

OTP: A one-time Password (OTP) is a type of secret number available only once to protect against the danger of fraudsters hacking your bank accounts.

OTPs will be sent to personal mobile phones via SMS and must not be shareable with others under any circumstances.

PIN/Password: A PIN or Password is a personal identification number set by the user to confirm whether it is correct by KBZ Bank and KBZPay every time customers access their KBZ Bank and KBZPay account.

Must change the PIN or Password immediately only if someone finds out.

PIN or Password, as well as other personal information such as

1. Registration no
2. Date of birth
3. Card numbers

*Never share the above information with anyone else.

Fraud Channels & Ways of Phishing

They can scam your money by acquiring the information via

- Fake Facebook Page
- Fake Viber Channel
- Fake Email
- Fake Website
- Fake SMS
- Fake Application

Ways of Phishing

- Now, fraudsters create fake channels such as websites, Facebook pages that can be mistaken as KBZ Bank, its services or employees to steal customers' personal information and financial information by sending messages via email or phone SMS, Viber, and Messenger.
- Fraudsters make the customers' to fill their KBZ mBanking Username and Password, KBZPay PIN/OTP Code, Credit/Debit card numbers, the Expiry Date and Security Code on the back of the card in the fake link.
- Fraudsters pretend to be bank employees and fraudulently obtain customers' OTP codes, log into KBZPay accounts and transfer money.

Customers are suggest to be careful of the above phishing in order to avoid the attacks of fraudsters.

1. Do not access links in messages sent from suspicious phone numbers or email addresses. If you access these links via phone, you must not enter your banking information at all.
2. NEVER share your OTP code, PIN, and Password with anyone else.

Biometric Login

Biometric Login Service is a face or fingerprint recognition feature available to access Mobile Banking App without having to enter User ID and password. Touch Login is available for iPhone or selected Android mobiles while Face login is currently available on the iPhone X and above.

Benefits

The Biometric login service makes mobile banking even faster. With a single touch/ scan face, you can login to your mobile banking. All your biometric data in your phone is now your password. No one can ever guess what it is and you always have it with you.

How to Apply KBZ mBanking?

When you click on “Fingerprint and FaceID” Icon which exists on the login page, you will be asked to type username and password to identify yourself. After typing username and password, One-time password (OTP) will be sent to your registered mobile device and you are about to type the OTP in order to complete the registration.

Auto OTP

Auto OTP is an OTP that is sent to your app directly and verified in the background securely, saving your trouble of keying in an OTP sent to you via SMS. Auto OTP is more secure and quicker.

How to Apply?

When you log in to KBZ mobile banking app, the app will prompt the Auto OTP introduction page. If you click on the “NOT NOW” button, the page will be dismissed. It will show again when you log into the app next time. If you click on the “Don’t ask me again” button, it will not show again when you log into the app next time on this device. If you want to proceed to register Auto OTP, please check “I accept Terms and Conditions” and click on “NEXT” button. Then SMS OTP is sent to you and you are asked to enter OTP.

transaction history

You can check your account details and transaction history by clicking on “Account Overview” on the home page.

Forgot password

In case you forget your KBZ Mobile Banking account password, you can reset yourself by clicking on “Forgot password?” on the Login page.
